

The decision by Sinclair to force airing of a clearly political show is, if not a violation of the law, clearly a violation of the intent of the law. Should the controlling corporation continue, it seems the FCC should revoke their licenses or force them to pay a substantial fine and they should be made aware of the consequences before the airing. Mr. Powell's comments that no action can be taken before the airing because no rule has been broken until it is broken is ludicrous.

I am in fact, not a democrat but instead an advocate of a reasonable democracy. The public has many ways to retrieve whatever information they desire, they don't need to be force fed by an organization with a clearly one-sided agenda. Forcing this show on the broadcast airways sets a very dangerous precedent, not only for future action but for wealthy individuals and corporation to seize control of broadcasters to promote their own agenda. We need to stop the madness on both sides, not racket it up another level.
